Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This application contains claims directed to the following patentably distinct species: Group I, claims 1-5, directed to an Internet phone system having an Internet terminal with 3 interfaces, and a switching system that switches the 2nd and 3rd interface according to whether the PSTN or Internet is used; Group II, claims 5-13, directed to a telephone device having (a) audio signal input/output terminal connected to an Internet terminal, (b) a control signal input/output terminal connected to an Internet terminal, (c) command input system, (d) a signal switching system; group III, claim 18, directed towards a phone system having (a) 1st & 2nd audio signal input/output terminal, (b) 1st & 2nd control signal input/output terminal; Group IV, claim 19, directed towards a method of controlling a telephone device having a switching and controlling step; Group V, claim 20, directed towards a method of controlling an Internet terminal device having only a controlling step; Group VI, claims 21-27, directed towards a phone system having a telephone system and a Internet terminal device, with both phone/devices having 1st & 2nd wireless interfaces, and a controlling system; Group VII, claims 28-37, directed towards a plain phone terminal with no Internet claimed; Group VIII, claim 38, directed to an Internet phone terminal; and Group IX, claim 40, directed towards a recording medium. The species are independent or distinct because each of the 9 separate groups requires different elements than the other groups of claims.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Art Unit: 2614

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Any inquiry concerning this communication should be directed to Creighton H. Smith at telephone number 571/272-7546.
